

Faculty	Faculty of Engineering & Technology		
Assessment Name (Eg: End/Sup)	End	Paper Code	CICO/G22E
Module Name	Introduction to Computers	Module Code	C5-ICO-11
Semester (E.g Jul-Dec-2021)	Jul-Dec-2022	Submission Mode (E.g Turnitin, blackboard, hardcopy)	Turnitin & Blackboard
Total Marks	100	Duration	4 weeks
Assessment Type (Eg: Written/Practical/Submission)	Submission	Exam/Submission Date	07/11/22

Instructions

1. This ICA has 5 questions and must be answered.
2. Create a folder named **"your FullNames_StudentID"** where you will save all your work which will later be **zipped and submitted on blackboard**.
3. Marks for each question is indicated by bold square brackets.
4. Read each question carefully before attempting it.
5. All files **except the report** should be stored in a folder to be submitted through blackboard during end assessment submission.
6. Submit **through Turnitin a Microsoft word report with screenshots** documenting how you attempted all the questions.
7. Failure to meet the Turnitin and blackboard deadline submission will result in your work not being assessed. Late submissions will not be accepted.
8. Submission made through emails will not be marked.
9. **Submission deadline: 7/11/2022**

Scenario

A small business in town called “**Company XYZ**” is considering expanding its business by opening a number of branches in at least 5 districts of Lesotho. Company XYZ has a very limited budget for them to successfully complete this task, and therefore requires a business consultant such as you to help them achieve their goals, by looking for potential sponsors for them and advise on how they can secure their company’s data without accumulating high costs. The company currently has about ten (10) employees with different salaries according to their job descriptions.

Since Company XYZ is small in size, it is not well known by many business people or potential sponsors, which requires an outstanding pitch from you as a consultant to sell the company to the sponsors. Furthermore, Company XYZ gives back to the community by sponsoring some students from poor background with a scholarship. They are currently sponsoring only eight (8) students from different parts of Lesotho, and the company keeps records of each student in order to keep track of their details and school performance. The company also asked you to document types of computers in use for them to show the sponsors different options they could be assisted with in order to store and share the company’s information for easier access, sending, retrieval and communication between them, clients and business partners.

With reference to the above scenario, write a detailed report and answer the following points;

1. Give a detailed background and differences between four classes of computers with screenshots and citations to support your research. Further discuss types of storage devices with examples. **[25]**
2. Use mail merge to write sponsorship request letters to a list of sponsors provided under **appendix A.1 on the appendix A section**. Your letter should include all required fields necessary for an official letter. Include screenshots and details of every step you took up to completion of mail merge in your report. **[15]**

3. Use the table provided under **appendix A.2** to perform calculations in excel. Include screenshots of each calculation clearly showing a formula used in the formula bar. [20]
 - a) Use a formula (not a function) to calculate the Final mark of Students. [2]
 - b) Use a function to test if there is a student who scored a 100 on either final-ICA or end assessment. [2]
 - c) Use the "IF" function to assign students a Status based on the following; Proceed (if final ICA is 50 or more), Supplement (if final ICA is between 30 and 49) or Retake (if final ICA is 29 or less). [6]
 - d) Count the number of students who are proceeding using "count-if" function. [4]
 - e) Make use of relative, absolute and mixed data referencing to calculate sum of all student's final-ICA using a formula. [2]
 - f) Use v-lookup function to return End Assessment Marks of Relebohile. [2]
 - g) Use H-lookup function to return the name of a Student who got 35 on final-ICA. [2]

4. Refer to **Appendix A.2 – A.4** and answer the following; [20]
 - a) Create a database named **"XYZ_database"** with the following tables; **Employees** (*Emp_ID, Name, Surname, Position, Salary*), **Sponsors** (*SP_ID, SP_name, Address, District*), **Branches** (*B_ID, B_name, B_district*) and **Students** (*Stud_ID, Stud_name, Stud_surname, Gender, Institution*). [5]
 - b) Create a relationship to join tables such that: Morena and Puleng are sponsored by XYZ-MAS Branch, Lerato, Phuthi and Lineo are sponsored by XYZ-QN Branch, Relebohile and Nthabiseng are sponsored by XYZ-MHK while Jabulani is sponsored by XYZ-MFT branch. [2]
 - c) Create a query to display the details of the employees that are working at XYZ4 Branch and name the query **"MFT_employees"**. [2]
 - d) Create a query to display the Student ID, Name, Surname and the district of the students that are sponsored by XYZ5 and name the query **"QN_students"**. [2]
 - e) Make use of reports to give a list of sponsored students for each branch, name the report **"Sponsored_Students"**. [2]
 - f) Create a form for each table that has a submit, save and close buttons respectively and name each form by its table followed by TB, e.g. *Students_TB*. Insert a record of your choice using all the forms and provide a screenshot that outlines steps taken and results after inserting on each table. [2]
 - g) Create a query to display employee names that starts with **"S"** and name it **"Names_Query"**, another query that displays surnames that ends with the letter **"I"** and name it **"Surnames_Query"**, and lastly a query that displays employees that works under marketing department, then name the query **"Marketing_Query"**. [3]
 - h) Create a validation rule that restricts adding employee salary greater than M15 000, and another rule that specifies that students gender ought to be inserted as **"M"**, **"F"** or **"O"**. [2]

5. Create a very creative business card for company XYZ employees. The business card should be very creative and must include all necessary information required for a business card. Detail all steps taken towards the final product with screenshots in the report. Furthermore, create a PowerPoint presentation giving a tutorial for Company XYZ employees on how they could use **One Drive** to store their data and **MS Outlook** to communicate with clients and students they sponsor. [15]
6. All work must be well cited and referenced. Include a list of at least 5 references with not more than 1 website source. [5]

NB:

- Include screenshots for each question attempted (showing results and formulas used where applicable) and an explanation of how you went about performing calculations, creating designs, database, tables and/or preparing presentations etc.
- Questions without screenshots will automatically give you a zero, unless your instructor specified otherwise.
- There should be a detailed explanation of how you attempted each question inside your report.
- Your report should also have a cover page, table of contents and reference list on the last page of your report. Marks will be deducted for a report that does not adhere to the instructions provided.

Appendix A

A.1 A list of potential sponsors identified by Company XYZ

Title	Names	Company	Address
Mr.	Napo Tlali	White Pharm.	P.O. Box 291, Maseru 100
Ms.	Lebohang Rabiri	Dot.com	P.O. Box 456, Berea 300
Prof.	Thato Matsipa	Kopanang Mehaeso	Private Bag 1789, Leribe, 200
Mr.	Lebohang Lekoete	Lekoete Trucking	Box 442, Mohale's Hoek 800
Prof.	Lineo Nkoapo	Something Koafela Pty Ltd.	P.O. Box 112, Mafeteng 100

A.2 Sponsored students records kept by Company XYZ for the previous academic year

Student ID	Student Name	Gender	Institution	Final - ICA	End Assessment Mark	Final Mark	Mark of 100	Grade (A*, A, B* ..., F)
2127009	Morena	Male	Romans	50	35			
2127010	Puleng	Female	Newville	90	65			
2128009	Lineo	Female	Ntlatfatso	65	80			
2128123	Lerato	Female	Ntlatfatso	30	50			
2128234	Phuthi	Male	Romans	100	70			
2128345	Relebohile	Female	Newville	85	10			
2128456	Nthabiseng	Female	Haven Uni.	65	100			
2214476	Jabulani	Male	Hillside view	35	50			

A.3 Company XYZ employees

Employee ID	Name	Surname	Position	Salary	District
001	Jacob	White	Head HR	M12 000	Maseru
002	Happy	Sono	Managing Director	M15 000	Maseru
005	Samuel	Johnsons	Marketing	M8 000	Mohale's Hoek
110	Moleboheng	Monaphathi	Marketing	M8 000	Qacha's Nek
120	Goodwill	Ngobeni	IT Officer	M10 000	Maseru
325	Sebastian	Hollard	Branch Manager	M14 000	Mafeteng
333	Johnson	Ntini	Marketing	M8 000	Leribe
340	Sonny	Manning	IT Officer	M10 000	Mohale's Hoek
440	Sammy	Moon	Sales Officer	M5 000	Qacha's Nek
750	Thato	Moleng	HR officer	M9 000	Leribe

A.4 Company branches

Branch ID	Branch Name	District
XYZ1	XYZ-MAS	Maseru
XYZ3	XYZ-MHK	Mohale's Hoek
XYZ2	XYZ-LRB	Leribe
XYZ4	XYZ-MFT	Mafeteng
XYZ5	XYZ-QN	Qacha's Nek
