

BGP Internship Work Plan

This form is to be completed by the BGP Intern in discussion with their BGP Internship Supervisor by the the second week of their BGP internship and then be submitted to their BGP Internship Tutor. This form contains details of the Intern, the Internship Supervisor, Interns tasks and activities and the academic knowledge, technical skills and soft skills required to successfully complete these. In addition, this form also provides guidance to the Internship Supervisor and Internship Tutor to ensure that the tasks and activities assigned to the Intern are relevant to the Interns' program of Study.

Internship Tutors must evaluate this form at the earliest to request for changes in the tasks assigned by the Internship Supervisor, in case they are not relevant to the Intern's program of study. Please complete this carefully and review with your BGP Internship Supervisor before submission. Once this form is completed and signed, all parties agree that the the BGP Internship Work Plan is suitable for the BGP Internship. Completion of this form accurately and in all respects is MANDATORY by the Intern within the given timelines. **Please do not edit or delete any questions in this form. Simply respond to each question in the space provided.**

***indicates required question.**

1. BGP Interns Email *

Molaoa.molaoa@bothouniversity.com

2. BGP Interns Student ID *

2230372

3. BGP Intern Name *

Molaoa David Molaoa

4. BGP Intern's Programme of Study (Please mention this exactly as your Qualification name in full) *

BSc Hon in Mobile Computing

5. Type of Internship * *Mark only one.*

☒ Physical/In-Person

☐ Virtual

6. BGP Internship Company *

Girls Coding Academy

7. BGP Internship Location (Mention both City and Country) *

Lesotho, Maseru

8. BGP Internship Supervisor's Name *

Khotso Moleleki

9. BGP Internship Supervisor's Email address *

moleleki.k@girlscodingacademy.co.ls

10. BGP Internship Official Start Date (Virtual Interns may have different start dates from those on Physical Internships) *

10 July 2025

11. BGP Internship Tutor Name (This info will be communicated to you on Blackboard, please check carefully). *

Likeleli Lekhanya

12. BGP Intern Tasks /Activities/Job Description (Please separate each Task with a comma or give it a number and provide as much detail as possible. This is essential to understand if the Tasks and Activities assigned are relevant to the Interns program of study). Please ensure this section is written with no spelling error, in great detail and provides full clarity. *

- Teach foundational coding skills and essential computer literacy to children aged five and above, employing age-appropriate methodologies to introduce basic programming concepts and foster engagement.
- Assist in the facilitation of the First Lego League (FLL) robotics program by supporting students in understanding robotics principles and guiding them through the construction and animation of projects utilizing block-based programming environments.
- Employ the “Scratch” programming platform extensively to deliver lessons related to FLL and animation projects, while introducing the “Spike” software to students aged ten years and older to advance their knowledge of robotics and hands-on programming.
- Support the delivery of the “Introduction to Computers” curriculum by instructing students on basic computer operations, including the proficient use of input devices such as keyboards and mice, typing skill development, and an overview of computer hardware components and their functions.
- Assist in the preparation and facilitation of practical sessions for the Web Development course, which encompasses fundamental website design using HTML and CSS, ensuring readiness despite the current lack of enrolled students.
- Provide instructional support by aiding the lead instructor during lessons and helping students during practical activities to enhance learning outcomes and maintain classroom engagement.

1. Hardware Resources if any provided to BGP Intern by Company to perform Tasks or Activities above (please separate them with a comma and provide as much details as possible). *

sensors, actuators, controllers and the structural frameworks.

2. Software Resources , if any provided to BGP Intern by Company to perform Tasks or Activities above (please separate them with a comma and provide as much details as possible). This could also include any trainings provided as well. *

Spike and scratch.

3. Specify the Academic Knowledge required from the BGP Intern to perform assigned Tasks or Activities. Please provide as much detail as possible.*

The BGP intern is expected to have academic knowledge in key areas of computing and software development. This includes a strong understanding of programming principles, particularly in languages such as Java, Python, or JavaScript, as well as knowledge of web development technologies like HTML, CSS, and basic frontend frameworks. The intern should also be familiar with database management concepts and SQL for handling data storage and retrieval. Additionally, academic exposure to software development methodologies, basic cybersecurity principles, and user interface design is important. This foundational knowledge enables the intern to engage meaningfully in coding projects, support workshops, and contribute to the development of learning materials and digital solutions within the Academy.

4. How does the BGP Intern plan to supplement the internship work experience with additional reading, research and consultation? This must be discussed and agreed between the Intern and the BGP Internship Supervisor.*

The intern has agreed to supplement their internship experience with additional reading, research, and consultation as part of their professional development. We have discussed that they will regularly refer to relevant technical documentation, online tutorials, and industry-related articles to deepen their understanding of the tasks assigned. The intern will also conduct independent research on topics related to coding standards, software tools, and best practices in project development. I will provide guidance by recommending specific resources and will be available for weekly consultations to address any questions or challenges. This plan is intended to enhance the intern's learning and ensure alignment with the objectives of the Botho Graduate Profile.

5. Please specify the Technical Skills required from the BGP Intern to perform assigned Tasks or Activities. Please provide as much detail as possible. *

To perform the tasks assigned at Girls Coding Academy as a BGP intern, you need a good understanding of basic computer and coding skills, especially for young children starting from age . This includes knowing simple programming ideas like sequencing, loops, and if-then rules, and being able to explain these in a way that young kids can understand. An Intern should be familiar with block-based coding programs like Scratch, which is used in the First Lego League (FLL) robotics course to help children create animations and learn programming. For older children, especially those above 10 years old, you need to know how to use the SPIKE software with Lego robotics kits. You should also know the basics of how computers work, such as using a keyboard, mouse, and understanding simple computer parts. When helping with the web development course, you will need some knowledge of how websites are built using simple tools like HTML and CSS. And also, it is important to have good communication skills to help and guide students during lessons, assist the main teacher, and solve simple problems students might face while coding or working with robotics.

6. Please specify the Soft Skills required from the BGP Intern to perform assigned Tasks or Activities. Please provide as much detail as possible. Please refer to <https://botswana.bothouniversity.com/students/botho-graduate-profile-2/> for a list of essential soft skills for all Botho interns. *

The intern must demonstrate strong communication skills, both verbal and written, to convey ideas clearly and professionally. Collaborate effectively within teams, showing respect for diverse perspectives. Apply critical thinking and problem-solving abilities when facing technical challenges. Manage time efficiently to meet deadlines and prioritize tasks responsibly. Uphold professionalism and ethical behaviour in all interactions and responsibilities. Adapt quickly to new tools, tasks, or environments and remain open to feedback. Show digital literacy and confidence when using technology and software tools. Take initiative, contribute ideas, and demonstrate a proactive attitude in all assigned activities.

7. What are the Technical and Soft skills expected to be gained by BGP intern as a result of the Tasks and Activities and this Internship? *

The intern is expected to gain a range of technical and soft skills through the tasks and activities undertaken during the internship. Technically, the intern will improve their proficiency in programming languages, software tools, and debugging techniques relevant to real-world coding projects. They will also gain experience in using development platforms, version control systems, and collaborative project management tools. Soft skills development includes enhanced communication skills through reporting and teamwork, improved critical thinking and problem-solving from handling technical challenges, and strengthened time management through meeting deadlines. The intern is also expected to develop professionalism, adaptability in dynamic environments, digital literacy, and a proactive mindset—aligning with the core attributes of the Botho Graduate Profile.

8. How will an BGP Intern be supported by the Internship Supervisor and the Company during this internship to complete the Tasks and Activities assigned? *

Unlimited wi-fi coverage within the workspace and the privilege to use the Printers and Organisation's Computers.

9. What will be the methods of evaluation used by the BGP Internship Supervisor to assess the BGP Intern's performance.
Please check ALL that are applicable.*

Tick all that apply.

- ☒ Continuous Monitoring on the BGP Internship Work Plan
- ☐ Regular Communication with Internship Tutor
- ☒ Constructive Feedback given to Interns in Writing with Clear Action Plans for Improv
- ☐ Tests, Quizzes and other such forms of Evaluation
- ☒ Achievement of Project Deliverables
- ☒ Performance Evaluation
- ☒ Other Click or tap here to enter text.

10. Each BGP Intern is expected to complete and submit this form with the assistance and consent of their BGP Internship Supervisor, to their BGP Internship Tutor within first few weeks of starting their internship.*

“The BGP Intern understand and accepts that this work plan will form the basis of evaluation and monitoring of their BGP Internship along with other mandatory documentation. Any attempts to deliberately falsify any information here may lead to disciplinary proceedings against the intern.”

☒ I, the BGP Intern agree that my BGP Internship Supervisor and BGP Internship Tutor has accepted to this work plan
