

MS Access 2016 Weekly Activity

- 1) Create a database file “Faculty of Engineering and Technology” and create the following tables:
[6]

Lecturer

Field Name	Data Type
<u>Lecturer_Code</u>	Number
Lecturer_Name	Short Text
L_Surname	Short Text
Age	Number

Batch

Field Name	Data Type
<u>Batch_ID</u>	Short Text
Batch_Name	Short Text

Module

Field Name	Data Type
<u>Module_Code</u>	<u>Short Text</u>
Module_Name	Short Text

2) Using the appropriate type of table relationships

- Create a relationship between Lecturer and Batch Table. [2]
- Create a relationship between Batch and Module table and make sure you check enforce referential integrity checkbox. [2]

3) Insert the following records: [6]

a. Lecturer_TB

L_Code	L_Name	L_Surname	L_Age
111	William	Nkomo	52
112	Rantsieli	Posholi	39
113	Ranganai	Turugare	47
114	Jacob	Mahlatsi	30
115	Matello	Sethobane	35

b. Batch_TB

Batch ID	Batch Name
B1_ICO	ICO_Batch1
B2_ICO	ICO_Batch2
B3_ICO	ICO_Batch3
B4_ICO	ICO_Batch4
B1_IPC	IPC_Batch1
B2_IPC	IPC_Batch2

B4_SEN	SEN_Batch4
B5_SEN	SEN_Batch5
B1_JAVA	Java_Batch1
B2_JAVA	Java_Batch2
B1_OSH	OSH_Batch1
B1_MAT	MAT_Batch1
B2_NH1	NH1_Batch2
B4_CSA	CSA_Batch4

c. Module_TB

Module Code	Module Name
ICO_11	Introduction to Computers
IPC_11	Introduction to Programming using C++
SEN_11	Software Engineering
JAVA_11	Programming using Java
OSH_11	Operating Systems and Hardware
MAT_11	Mathematics
NH1_11	Networks and Hardware
CSA_11	Computer Systems and Architecture

- a. Create a validation rule under lecture table that restricts lecturers that are below 30 and above 55 years of age to be entered on the table. **[2]**

- b. Insert the records such that Mr. Nkomo is teaching (**ICO_Batch1, ICO_Batch2, SEN_Batch5**), Mr. Mahlatsi (**ICO_Batch3, IPC_Batch1, Java_Batch2**), Mr. Ranganai (**IPC_Batch2, Java_Batch1**), Ms. Sethobane (**MAT_Batch1, OSH_Batch1**) and Mr. Posholi (**ICO_Batch4, NH1_Batch2, CSA_Batch4**). [6]
 - c. Link all the batches with the modules that they belong to. [4]
- 4) Use form wizard to create a form for each table. Add 'Save' and 'delete' buttons in each form. [3]
- 5) a. Create a query to display all the modules that are instructed by Mr. Posholi. Save the query as Posholi_Modules. [3]
 - b. Design a query to display all the lecturers that are teaching Introduction to computers. Save that query as ICO_Lecturers. [3]
 - c. Create a query to display lecturer surnames that ends with "I" and another query that displays lecture surnames that begins with "R". Name the surname query Sur_Query and the names query Fir_Query. [6]
 - d. Create a delete query to remove batch 2 of ICO from Batch table. [3]
- 6) Create a report to show all the modules that are instructed by each lecturer. [4]
